Internal Chainlink Enclosure With Bike Racks

Fairfax Media recently invested over \$7million in their brand new Ponsonby premises, which is home to more than 500 of their Auckland staff members each working day.

The move aimed to ease transport for the business's many staff.

With this, Fairfax's contractor Ebert Construction contacted Hampden Fence to assist with an aspect of the building, which also contributes to the ease of transport.

Hampden installed a purpose built pipe & mesh chainlink bike enclosure and bike racks to provide a dedicated, safe space for cyclists within the building's busy carparks.
