

Harbour + Airport
Ports Of Auckland

As New Zealand's leading high-security fencing, gates, and automation solutions provider, Hampden Fence should be your first point of contact for a tailored high-security package for your property.

Ports of Auckland have undertaken a trail to automate container movement from storage to the trucks that move them around the country. Automation is great for safety and efficiency but comes with its own set of challenges. Hampden worked with the PoA team to specify, design and install a full turn-key solution that would separate people and trucks from the automated container hoists. The key considerations were safety and efficiency. When you expect to move 500+ containers per day a few minutes worth of time savings per container is a big deal.

Case Study - Ports Of Auckland

Included in the installation were the following products:

- 100% duty cycle high-speed barrier arms fitted with safety skirts
- Swing gate automation
- Palisade swing gates with integrated magnetic locks
- ArmourFence Palisade fencing
- Chainlink mesh
- Aluminium cantilever security gate
