Sylvia Park - Internal Caged Storage

Internal Caged Storage With Fall Arrest Cables

With more than 200 stores, Sylvia Park is one of New Zealand's largest shopping malls. The site keeps on growing with the addition of more international brands like Zara and H&M.

With Sylvia Park's growing list of new stores, the need for more storage went hand-in-hand. Kiwi Property called upon Hampden to install purpose-built internal storage cages

using Pipe & Mesh Chainlink enclosures. Each enclosure door includes a fall arrest safety cable, a standard addition to all swing gates installed by Hampden. These cables ensure the safety of staff using the storage units if the gate hinge were to become damaged and fail, the fall arrest cable would prevent the gate from falling and therefore protect a person from being injured.
